Get Item Purchase Code

To get your item purchase code, you need go to your **Codecanyon** account
go to downloads page, find item, click download and choose License certificate & purchase code.

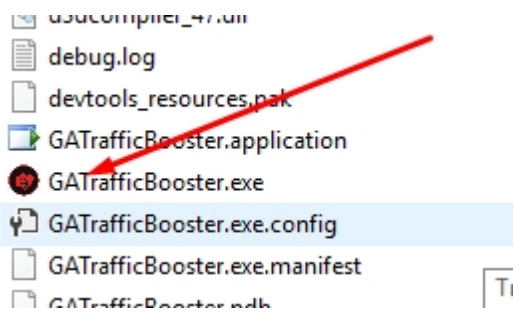

How Activate Purchase Code

You need to send your Item Purchase Code with your Item Name to ga-support@markett.su

How To Use

First open program:

Then enter your purchase code on this screen:

Then you need to enter:

- your site url
- sessions count (users count) max to input 3000, if you want more you can click "Send Traffic" Button multiple times
- chose traffic locations
- browser language tags (divided by comma)
- choose search engines
- enter keywords (each keyword on new line)
- enter relative paths to pages that user be came (each keyword on new line)
  the session will started with pages order, if you want to have random page hits you need
  to check "randomize pages order for each session", in that case the firs page will be entry point, and other pages will   be in random order for hits
- click to "Send Traffic" and traffic will be sended, in left top corner you will see how many tasks you have

Do not close programm until in left top corner you have runned tasks, that need to generate session avg time that user spent on your site
